

The Human Body

Goal: To identify and understand the systems of the Human Body

Expectation: 3.1 identify major systems in the human body (e.g., musculoskeletal system, digestive system, nervous system, circulatory system) and describe their roles and interrelationships

Task: Choose ONE of the following body systems:

Muscles

Bones

Digestive

Circulatory

Respiratory

Excretory

Endocrine

Nervous

Research your system and make a poster about it. List all the parts of your body system and explain what they do. Your poster must have both text and graphics. You may NOT 'cut and paste'. You must write the information in your own words.

Here are some websites you could explore to get information (you must view at least TWO websites):

Muscles: http://www.kidsbiology.com/human_biology/muscles.php

Bones: http://www.kidsbiology.com/human_biology/skeletal-system.php

Digestive: http://www.kidsbiology.com/human_biology/digestive-system.php

Circulatory: http://www.kidsbiology.com/human_biology/circulatory-system.php

Respiratory: http://www.kidsbiology.com/human_biology/respiratory-system.php

Excretory: http://www.kidsbiology.com/human_biology/excretory-system.php

Endocrine: http://www.kidsbiology.com/human_biology/index.php

Nervous: http://www.kidsbiology.com/human_biology/nervous-system.php
